## Today's Thought

We cannot control the evil tongues of others, but a good life enables us to despise them.—Cato.

## Local School Board Re-Engages Teachers

The entire teaching staff of 35-36 has been re-engaged for the coming term. At the last inspection every member of the staff received an excellent report. In the case of the three lady teachers small increases in salary have been granted.

Ratepayers and parents should well be proud of the excellent state that the local school is in, both educationally as well as financially.

All the Board and the Secretary are deserving of great praise for the way they have conducted the District's affairs.

## Dog Pound Midgets versus Crossfield Midgets

An interesting and sporting game was played at the local diomond on Saturday evening between Dog Pound Juveniles and Crossfield, resulting in a win for the Dog Pound boys by a score of 5-4.

Outstanding hi-lites of the game were the home runs of R. McBain, Dog Pound, (1) and K. Miller, Crossfield, (2). Splendid catches by J. Stevens and Mervin Patmore of Crossfield.

Both pitchers were in good form, and the local Midgets had the edge on the fielding.

## Box Score

Dog Pound	AB	R	H	P	O	A	E
McBain M., c.	4	1	2	0	2	1

Umpire—L. Raisbeck.

A return game at Dog Pound will be played in the near future.

## Softball Club Dance.

The dance held in the East Community Hall last Friday night, July 17th, under the auspices of the ladies and mens softball teams, was enjoyed by a good crowd of enthusiastic young people.

This affair was very capably managed by Miss Ollita Bills, Tunis Robertson and Albin Laur assisted by members of the teams. Their efforts to make the dance a success were rewarded in the evident enjoyment of the dancers.

The sponsors wish to extend their thanks to Mr. Ableman for his thoughtful and timely assistance.

Winners of the Prize Waltz were, Miss Spalding, of Carstairs, and Gavin Goldie. Second prize went to Miss Ableman and Jack Ferguson. It was a close decision for the Judges, Mrs. R. Bills, Mrs. G. Wickerson and Lee Ableman.

The East Community Midgets kept the crowd supplied with ice cream and cold drinks, they report a nice profit.

## DOG POUND SPORTS.

As we go to press we have not the space to give a detailed report on the doings of the Day. The day started with the Ball Game between Dog Pound and Crossfield Midgets resulting in a win for the former by a score of 8 to 7. Weather conditions were ideal and there was a good crowd and from our personal survey we think the day a huge success.

## Crossfield Meat Market

CROSSFIELD ALBERTA

## Madden Resident Passes On

Suddenly at her home east of Madden, in her 70th year, Cornelia Stone, beloved wife of H. J. Stone, passed away at 5 a.m. Tuesday morning, July 21st, 1936.

While Mrs. Stone had not been in perfect health of late, the sudden demise was totally unexpected. Mrs. Stone was born at Sacramento, California. United in marriage to H. J. Stone in 1889. Came to Canada in 1903 and settled in the Madden district. Member of the Old Timers Association.

Leaving to mourn her passing, besides her husband, H. J. Stone, are two sons, Lawrence and Ira, of Madden, and two daughters, Mrs. W. Kiel, of Madden, Alberta, and Mrs. F. Johnson, of Dorothy, Alberta.

Funeral arrangements are in the hands of the Armstrong Funeral Home, Calgary.

Service at 2 p.m. Friday, at the United Church, Rev. E. Longmire officiating. Interment at Crossfield Cemetery.

## "Mother Lies Aleep"

All life's yesterdays are dust; We see not, neither do we hear, Mother lies asleep. Her toil-worn hands folded. In our hearts tears fall. Stirring one like poignant organ notes. Sweeping through a vast cathedral. And then, as in a dream, One seems to lean o'er us, And whisper, Forget, forget, Remember only sunlit days. On some far hill trees murmur. In the breeze threnodly. For one who rests, Until God calls us all Home over the hill.

## Auto Overturns; Edmontonian Woman Hurt

Unconscious from the time of the accident in which she was injured Sunday afternoon, seven miles south of Carstairs, Mrs. C. C. Trusdale, of Edmonton, died as a result of her injuries in the Holy Cross Hospital late Monday night.

Remains were forwarded by Guy Armstrong, funeral director, Calgary, to Edmonton Tuesday, where funeral services and interment will take place.

## Calf Club Field Day July 28th

A joint picnic comprising the four Boys and Girls Calf Clubs of Crossfield, Simons, Valley, Grainger and Olds, will be held at the School of Agriculture grounds, Olds, on Tuesday, July 28th.

Everyone is invited to attend, and the day will be of special interest to all feeders of beef cattle. It makes no difference whether you belong to the Calf Club or not, but if you are interested, come out and show that you are. The affair will commence shortly after noon, so bring along your lunch, and it is expected that tea or coffee will be provided at the school.

This should be an interesting day, so let's see that Crossfield Calf Club is well represented. Any further particulars can be obtained by giving Secretary May a phone call. R1403.

## CROPS

The last crop report issued by the Department of Edmonton is far from encouraging.

Eastern portions of the Province have abandoned any hopes of harvesting a crop. That part of the Province from Taber-Medicine Hat line north through Berry Creek to Provost has suffered intensifying and an almost complete crop failure predicted.

Pastures and forage crops in these districts are burned up and a feed shortage is causing concern.

In the more westerly districts from U.S. boundary north through Calgary, hot weather has also taken heavy toll, but with rain immediately fair crops may yet be harvested in some sections.

## HOW'S YOUR ARITHMETIC

Take two Kens plus one Donald plus one Tom and what do you get? Why, the Gloomchaser's course. Multiply these four by fifty and the answer is the crowd at the dance. Divide the first two by the last two and you get U.F.A. Hall. So by the law of Archimedes the density of a good orchestra is a good crowd to play to in a good town.

No prizes given for this Algebraic Quotation; but be out to the U.F.A. Hall on July 25th.

## MODERNIZE NOW!

Add to the value, appearance, comfort and life of your property.

## Auto Accident on Calgary Highway

Driving south on the Calgary highway Saturday evening, Mr. Gish, Jr., of Calgary, and two other friends, were involved in a blow-out accident, about four and half miles south of Crossfield.

The car turned over several times, but fortunately the occupants of the car got off without a severe shaking.

Mr. Gish, Jr. is a young son of W. K. Gish, principal of the local school.

## BORN

To Mr. and Mrs. Ed. Clarke of Calgary, at the General Hospital, a daughter. (Mr. and Mrs. Clarke were former Crossfield residents.)

To Mr. and Mrs. V. Patmore, at their home in Crossfield, Tuesday, July 21, a daughter.

To Mr. and Mrs. V. Green, Monday, July 20, a son.

## New Banking Feature Commenced

Personal Loans. A Year To Pay

In order to provide borrowing facilities for all classes of employed people The Canadian Bank of Commerce announces the establishment of a personal loan service at its branch. A special department has been opened for the purpose of making loans to wage earners and salaried and professional men and women.

The plan is in brief, that any resident who is steadily employed and is acceptable to the Bank as a good credit risk may apply. The only security required is:

- (1) that the borrower must be of good character
- (2) that he be steadily employed
- (3) that he obtain the signatures of two other responsible persons to become guarantors. (This latter requirement is subject to modification under certain circumstances.) These guarantors may be fellow employee, office manager, employer, partner, merchant, professional man, relative; anyone of good character and satisfactory earning power.

Ownership of property is a desirable but not an essential qualification. The loans run for a period of a year, and to assist the borrower in accumulating the total of the loan from his monthly income he is required to make a twelve equal monthly deposits in a Savings account so that the balance of the Savings account at the end of the period will be sufficient to pay off the loan. On this Savings account interest at the current rate is allowed. Life insurance placed by the Bank on behalf of the borrower protects the estate of the latter and the guarantors in the event of his premature death. The cost of this insurance is 50c per \$100 and is paid from the accrued interest on the Savings balances.

The loans are discounted at the rate of 6 per cent. A service charge of a minimum of 50c and a maximum of \$3 is made, depending on the amount of the loan.

If the borrower wishes to make one or more Savings deposits in advance of the required dates he may do so provided they are in even multiples of the required monthly deposit, and in that case he will benefit by receiving a larger amount of interest from his Savings account.

The Bank emphasizes that it in no way desires to encourage people to assume unnecessary or burdensome debts, but it does feel that if and when the need to borrow arises through unforeseen emergencies, particularly in the case of sickness, dental bills, putting in the winter's supply of coal, and other similar pressing needs, it can be of real assistance by lending at low rates and on a reasonable budget plan of repayment. There is an additional advantage to this plan in that after a sufficient sum has been accumulated in the Savings account to repay the advance the borrower will have acquired the habit of making regular deposits, thus building up a fund to take care of special needs in future.

The plan has elicited favourable comment from large employers of labour. The general feeling is that in the extension of banking credit facilities on a budget repayment plan to wage earners and others in receipt of small incomes the Bank is affording a valuable service. Already some large employers of labour have obtained detailed particulars of the plan with a view to bringing it specially to the attention of their employees so that the latter may know that there is a banking service now available under which they may borrow in case of need. Applications may be made at any branch of the Canadian Bank of Commerce.

## Home Markets For Local Produce

Assuming that a statement appearing recently in the daily press is correct, it seems an anomaly that a country so well equipped in many sections to produce wool as Canada should have to import that commodity from other countries.

Yet such apparently is the fact if credence can be given to the published assertion of L. R. McGregor of Toronto, Assistant Trade Commissioner for Australia to Canada when he said in a recent interview that "Canada is Australia's third best wool customer."

Not only are the western provinces well suited to wool production, both on large scale, the ranches in southern areas of Saskatchewan and Alberta and in all three prairie provinces on smaller scale from farm flocks, but it is generally conceded by authorities that conditions in these provinces enable Western Canada to produce wool of quality equal to the best anywhere.

Time was, not much more than a decade ago, when a substantial percentage of Western Canadian fleeces were offered to the market in poor condition. The quality often was there but many of the fleeces were greasy, filled with burrs and generally speaking ill prepared for market requirements.

Since that time, however, producers have learned a great deal about the preparation of wool, and the standard of the product has been vastly improved, so much so, in fact, that an unkempt fleece in shipments for market from the prairies is a comparative rarity today.

That being the case, it can be asserted with confidence that Western Canada can produce sufficient quality wool for domestic requirements in addition to considerable quantities annually for export, and the producer is now complying with market requirements in the preparation of his product.

Why, then, should it be necessary for Canada to import wool from other countries such as Australia and the Argentine? In the light of the facts, that appears an unanswerable question.

Another anomalous factor in the Canadian wool industry is the fact that although Eastern Canadian woolen mills are equipped with machinery to produce tops (wool in a partly manufactured condition) the machines are standing idle while tops are being imported from Great Britain. The reason, it is explained, is because tops can be manufactured more cheaply in England than in Canada. This is a plausible explanation, though the situation is an unfortunate one for this country, when it is remembered that there are plenty of idle workmen still in the East.

The anomalous situation at the production end, however, is one which should lead to some inquiries in the hope that the cause for a country like Canada importing wool can be discovered and, if feasible, rectified.

The statement made by the assistant trade commissioner for Australia engenders the question whether there is room for considerable development of the domestic market for other Western Canadian agricultural products, and inspires the question whether everything that is possible is being done to ensure absorption of home products in local markets to the greatest possible extent. If other agricultural products are subjected to competition of similar imports, it is a very unfortunate thing for the producers, and especially in this case at a time when farmers are turning to greater diversification because they are forced to by the European wheat situation.

Perhaps the solution to the problem of finding wider domestic markets for home grown products lies in the laboratory and this is a question worthy of investigation by farmer organizations, boards of trade and similar institutions and the government.

There are men today working quietly in private laboratories seeking means to extract by-products from wheat and other agricultural products, of which Western Canada has a great abundance, capable of conversion into fuels, clothing and other necessities and there is no doubt there is great opportunity for more research work along these lines.

The work of some of these men leads to the belief that therein may lie at least a partial solution of some of the west's agricultural problems. It is stated, and not without authority, that the secret of the manufacture of some of these commodities on a commercially feasible basis, has been wrested from test tubes and retorts and other paraphernalia of chemical and electrical engineering laboratories, and that all that is needed to make them a marketable reality is the necessary capital. Where this is to be found for such projects is another question.

### Thanks To Stamp Collectors

#### Heavy Purchases Financed Trip Of

#### Dirigible Around World

It was stamp collectors who financed the recent flight of the big dirigible to this country possible, Dr. Hugo Eckener told an audience of New York stamp collectors.

The famous designer said that seven flights were paid for only with the help of the stamp collectors and that they paid the whole expense of the famous trip around the world.

Explorers and pioneers in transportation of all sorts have a source of support in the stamp collectors of the world these days, and the collectors welcome the chance to share in the expense if it means a commemorative cover, suitably marked, for such a thing can never be duplicated, and is likely to increase in value. What a help a few thousand stamp collectors would have been to Columbus!—Port Arthur News-Chronicle.

A water drop cannot rise above the level of the body of water of which it is a part unless the sun's rays draw it up or unless it is driven by mechanical power, as in a spraying fountain.

Cotton and artificial silk material are being made by a process that assures it against wrinkling.

### Expert In X-Ray Work

#### People Owe Heavy Debt To Skill Of A Woman

Every veteran whose life was saved by X-ray location of a bullet in his body, every civilian whose hidden abscess beneath a tooth has been found by X-ray, owes a debt to the skill and devoted efforts of Elizabeth Fleischman Asheim. This woman, who has been called an American Joan of Arc, was not a physician but became interested in X-ray work through a doctor brother-in-law. She took a course in electrical science, bought X-ray apparatus and fluoroscope, rendered valuable aid to the Army during the Spanish-American War, and showed by the excellence of the diagnostic X-ray pictures she took how much X-rays could aid to military surgery. After the war she saw the possibilities of X-rays in dental work and was busy with this for the few remaining years of her life.—Quebec Chronicle-Telegraph.

A music-hall magician opens his act by guaranteeing to tell the exact age of any lady in the audience. The remainder of his turn is quite popular, though.

Church is the only place you have to be early to get a back seat.

And the darkest hour is just before the dawn. 2159

### Great Change Taking Place

#### Women Drifting Away From Kitchen

The average American woman is drifting further from her traditional place in the kitchen, according to a survey made by Quax, an honorary scientific fraternity for women at the University of Pittsburgh.

The scientific co-ed came to her conclusions while studying problems encountered in a quest of employment. Their detailed survey represented an effort to clarify and classify the many-sided difficulties in job-seeking and their relationship with the university graduate.

Interviews, letters and telephone calls to and from a thousand personnel directors of business organizations and public institutions revealed that many positions are waiting for trained women.

Opportunities are available, it was found, in a wide variety of business, educational and scientific spheres. Almost every branch of city, state and federal departments indicated that women, especially those trained in science, are needed.

The many possibilities included almost every phase of activity except that centred by the kitchen. The fate of the family's meals, it was indicated, is facing highly uncertain times.

### Extension Of Trade

#### Says Canada Should Co-operate With

#### The Best Of The World

Canada's aim should be greater development of trade with Great Britain, Hon. G. H. Ferguson told the Galt Kiwanis Club.

While advocating extension of trade, the former high commissioner to London said Canada can never follow a policy of isolation. Canada should co-operate with the rest of the world for its betterment and advancement. Britain has the greatest market in the world and the Dominion should capitalize to the fullest extent on this fact, he said.

The speaker predicted the Dominion would soon be a dominant trade nation once again and said the close connection between Canada and Great Britain has been an immense advantage. He paid tribute to the foresight and purpose of the fathers of Confederation who were "not dreamers but practical builders."

### Drouth Stricken Areas

#### To Expand Drouth Rehabilitation

#### Work In The West

Under the impetus of extension of drouth-stricken areas in Western Canada, the Dominion government has decided to expand its drouth-rehabilitation work in the west.

Hon. J. G. Gardiner, minister of agriculture, said financial assistance would be given farmers in the digging of "dugouts" or reservoirs of water for stock. This decision means assistance will now be given to all water conservation projects.

The basis of assistance to dugouts is three cents per cubic yard of dirt moved up to a maximum of \$50. In all cases the government provides engineering advice and all assisted projects must be approved by engineers.

Assistance on the same basis is provided for the construction of small dams.

### Great Difference In Weight

#### Small And Large Parcels Sent

#### Recently By Air Freight

Contrast in United States air freight traffic was shown the other day when a parcel weighing only two ounces and another weighing 500 pounds were transported.

The two-ounce package was a single false tooth the owner had left behind in a hotel bedroom, afterwards wiringless an urgent message to have his forgotten "filler" rushed to him. A mining machine crankshaft made up the 500-pound "parcel."

Another strange consignment was sent by a surgeon in Mexico. It was a tiny piece of living tissue and was rushed to New York for analysis. Laboratory workers carried out their tests and results were telegraphed to the surgeon.

### Coronation Plans

#### Duke Of York Heads Committee In

#### Charge Of Arrangements

The Duke of York will head the committee in charge of plans for the coronation next May 12, The London Gazette announced.

The committee includes Prime Minister Baldwin, the Archbishop of Canterbury and York, Chancellor of the Exchequer Neville Chamberlain, the Earl of Athlone, Sir Samuel Hoare, David Lloyd George, Winston Churchill and Sir Austen Chamberlain.

### Tragedy In Northern Seas

#### Russian Scientists Succumb To Cold

#### And Hardships

Twenty-year-old Ian Kruckhoff related the story of a grim voyage through the wild and icy waters of the White sea with a cargo of 10 dead men.

Kruckhoff was the lone survivor of a party of 12, all members of a scientific expedition. He reached safety in a lifeboat loaded with the bodies of 10 of the others. The 11th was not recovered.

The 12, headed by the hydrographer, G. Bardinoff, left the expedition's steamer *Toros* on June 27 in a small boat to make a study of the depth of the sea between Archangel and Kandalaksha bay, on a route crossing the Arctic circle.

"After three days' work," said the youth, "we decided to return to the ship."

"We were caught by a storm. Mountainous waves capsize the boat and swept away the oars, equipment and our comrade Nikolai Sedoskyeff, whom we never saw again. Struggling in the water, the rest of us with great difficulty managed to right the boat and climb in."

"Then for a day and a night we were the prey of a furious sea. 'We had no oars; we tried frantically to row with our hands. The boat constantly shipped water. We scooped it out with our hands and our caps. It was horribly cold. One after another, my companions died of exposure and exhaustion until I was left alone with 10 bodies."

"The sea grew rougher, and it was only by trying my right wrist to the boat that I was able to stick to the boat."

### From Siam To Surrey

#### Ex-King Prajadhipok Has Settled

#### Down In England

Ex-King Prajadhipok of Siam has just moved into his new home, on which he spent \$100,000 in improvements, in Surrey, England. It is a red brick house, standing in 15 acres of gardens, and it has four reception rooms, 12 bedrooms and six bathrooms. Every one of the rooms has been specially designed and furnished. The dining-room is in early Queen Anne style, the drawing-room in late Queen Anne. The other rooms are more modern. A motion picture theatre has also been built in which the family entertains visitors. Prajadhipok buys the latest talking films, and favors American gangster pictures.

### SELECTED RECIPES

#### BANANA CAKE

1/2 cup butter  
1 cup white sugar  
2 eggs  
4 tablespoons sour milk  
1/4 cup vanilla  
1 1/2 cups Purity Flour  
2 teaspoons baking powder  
1/2 teaspoon salt  
1 teaspoon vanilla  
1 cup mashed bananas

Method: 1. Cream butter; add sugar. 2. Add well-beaten eggs. 3. Add bananas and vanilla; beat well. 4. Dissolve soda in milk. 5. Sift flour with baking powder and salt and add, alternatingly with milk to mixture No. 3. 6. Bake in loaf tin 50 minutes in moderate oven of 350 degrees.

Emigrant: (Writing back home)

"And all the way across the long train journey was so tiresome that one man kept shouting at every stop 'Bored', 'Bored'. We were too—but we didn't say nothing."

Tall men live longer than short men, thin men longer than fat, married men longer than bachelors, and vegetarians longer than carnivorous men, according to statistics.

The word rosary is derived from the Latin *rosarium*, which was originally a garland of roses and used to crown the image of the Virgin Mary.

### House Flies Breed In Garbage

#### Dangerous Disease Carriers Menace

#### To Public Health

For many years public health efforts have reduced the scourge of typhoid fever and many other dangerous, contagious diseases by government enforced legislation in respect to the inspection of cattle, milk-pasteurization, the chemical purification of suspected water supplies, and the elimination of many other known breeding sources of disease. But little has been done officially about the common house-fly. Each summer it infests the land wherever mankind exists. It is borne and bred in rotten animal or vegetable matter, lives on filth and refuse, it carries germs of infectious diseases into the home endangering the health of everyone, from the defenceless baby in its crib to the elders of the house who relish the tasty salad, upon which a fly may have recently been feasting and spreading disease germs that have accumulated on its hairy legs.

Public spirited citizens should fully realize the seriousness of this menace and take measures to check it. Searching out hidden unsanitary fly breeding places, keeping homes well screened and foods covered at all times are important. But the quickest and simplest method of killing all flies is to place a few saucers of Wilson's Fly Pads around the house. They will attract the flies and kill them all in a few hours.

### The Court Of Claims

#### Begins Its Sittings After Coronation

#### Date Is Set

After the Coronation date is set, the strangest Court in the world begins its sittings in London. The Coronation proclamation set up the Court of Claims. It considers pedigrees and hereditary rights to serve the King in person.

Some claims which have come before the Court are:

To support the King to the altar. To carry the Great Spurs (part of the Coronation regalia).

To carry the Cap of Maintenance. To drink the King's wine as a guard against poisoners.

To have the bed which the King sleeps on the night before he is crowned.

Three claims which are likely to be allowed are those of:

The Earl of Shrewsbury, as Lord High Steward of Ireland, to carry a white wand as symbol of his office.

The Baron of the Cinque Ports to hold a canopy over the King's head at the Abbey.

The Lord of the Manor of Work-sop to present to the King a pair of fine gloves.

### Plan Crime Hospital

#### Scheme Is Suggested By Several

#### Prominent British Physicians

A movement to found a "crime hospital," where criminals may be sent for psychological treatment instead of being imprisoned, has been launched by Lord Dawson of Penn and several other prominent British physicians and psychologists. Officials of the home office are said to be in sympathy with the scheme, which they believe may lead to revolutionary changes in the state's attitude on crime. An appeal for \$50,000, with which to build a clinic in London, is being made.

### Plan Huge Liner

#### New Vessel To Be Longer And

#### Larger Than The Queen Mary

Preparations for constructing a bigger and faster companion to the S.S. Queen Mary were begun tentatively on the Clydebank. In shipping circles it was said the liner, if constructed, would probably be christened the King George V.

An official order for the construction still is awaited. It was suggested the projected liner would have a tonnage of about 85,000 as compared to the 50,775 of the Queen Mary.

An official of the John Brown Company which built the Queen Mary for the Cunard-White Star Line said: "We are almost certain to be given a tender although we have not received an official confirmation of the order."

The company had expected to receive an order for a battleship, but it was understood the admiralty work would be spread instead to other shipbuilders in North England to free the John Brown Company for the liner.

Cunard-White Star officials have been inspecting models of the proposed liner while experts have proposed altered and refined engine designs.

A Brown official said: "The new ship will be larger than the Queen Mary and faster."

It was understood that present plans call for a longer ship with greater passenger accommodations. The ship, it was said, would probably be placed in commission in 1938.

### The Left Turn

#### Care Should Be Exercised In Making

#### Turn At Road Intersections

A well known writer has estimated that a large proportion of auto accidents are caused by neglect of drivers to observe ordinary care in making the left turn at street and road intersections. The following points are noted:

If you desire to turn to the left do not approach the intersection on the extreme right of the street or highway but keep close to the centre of the road. If you approach on the extreme right you may turn to the left just as another car is coming up on your left.

Do not turn to the left close to the centre of the intersection but continue across the intersection until you are caused directly opposite the right side of the intersecting road or street, then turn to the left. If you turn to the left at the centre of the intersection you are in danger of meeting, head-on, a car coming up from your left.

Be sure to give the proper signal a reasonable time before you come to the intersection so that cars coming from behind are prepared for what you intend to do.

Even if the road or street is not marked with a strip up the centre, there are two imaginary strips on every road and street—the right and the left. On every right or left strip there are one, two or even three lanes. Keep on your own strip and in your own lane is the best advice possible to avoid accident.

Old tramcar bodies, discarded in favor of trolley-buses in various parts of London, can be bought at the depot for \$10 each; carting them away is the real expense.

SIMPLE DIRECTIONS ON THE PACKAGE  
Warehouses at Calgary, Edmonton, Regina and Winnipeg

## FOOD SHORTAGE IN BRITAIN IN THE EVENT OF WAR

London.—Discussing government measures to prevent a food shortage in case of war Viscount Hallham, the lord chancellor, remarked in the house of lords:

"If we lost command of the sea, we should lose the war and no method of food storage would save us."

He added that many practical difficulties would interfere with the maintenance by the government of large stores of Canadian wheat in Great Britain.

The lean days of the Great War, when food rationing was reduced to a minimum on account of the submarine blockade, were recalled by Baron Phillimore, who asked the government what was being done to prevent such a situation recurring.

Baron Strathairn, speaking on behalf of the Labor opposition, suggested that an arrangement should be made with the Canadian government by which wheat now stored in Canada might be stored in Great Britain.

Replying for the government, Viscount Hallham, the lord chancellor, pointed out that Great Britain now produced practically one-fifth of her requirements of foodstuffs.

"Expansion would be necessary in wartime," he said, "but we are in an infinitely better position than in 1914."

The lord chancellor referred to the success of the Ottawa policy of ensuring that the things Britain most needed would be available from the dominions and colonies, giving the examples of wheat from Canada, and butter, mutton and lamb from New Zealand and Australia.

In view of the difference in climate between Great Britain and Canada, he said, many did not share the opinions expressed about the possibility of storing grain in England.

The buying of wheat in Canada and bringing it here and turning it over, he said, would involve the government in becoming a wheat dealer in the world. The government would in effect be controlling the market, he declared, and moreover, the farmers here would ask the government to finance the holding of wheat in stock.

The total storage capacity of the country was 10,045,000 tons of wheat, flour and other grains, a "good three months' supply," Lord Hallham said, which would be calculated ought to tide over the few weeks at the outbreak of a war when the command of the sea might be endangered.

"If we lost command of the sea, we should lose the war and no method of storage would save us," he added. "Therefore the primary purpose of our foreign policy is to see that we are adequately prepared against attack and to provide adequate protection by sea and air for imports."

### Appointments Held Over

Government Has Long List To Be Dealt With

Ottawa.—The long list of appointments which the government must make will not be dealt with for several weeks, probably not until September, Prime Minister Mackenzie King said at the close of a cabinet meeting. The prime minister said a few appointments have been made, but he was unprepared to announce them until the orders had been signed by the Governor-General. He referred to the veterans' assistance commission approved at the last session of parliament.

The name of Col. J. G. Rattray, D.S.O., of Ottawa, former chairman of the Canadian farm loan board, has been mentioned in connection with the chairmanship of this body. The purpose of the commission will be to assist needy unemployed veterans to obtain employment.

### Opposes Trade With Russia

Hallifax.—The Halifax board of trade has joined with the Saskatchewan Retail Merchants' Association in requesting the Canadian government to refrain from entering into reciprocal trade agreements with Soviet Russia. Importation of Russian coal under any closer economic alliance with the Soviet would prove injurious to Nova Scotia industry, the trade board executive said.

New Brunswick Crop Good  
Salisbury, N.B.—While crops in many parts of Canada and the United States suffer from drought, those in New Brunswick are flourishing as a result of favorable weather. Hon. A. C. Taylor, provincial minister of agriculture, said.

## Reconstructing Trade System

Italy Is Planning A Complete New Structure

Rome.—A completely new international trade structure for Italy was envisioned by high Fascists.

It was said authoritatively the government was sending out special missions to other nations to seek new commercial accords.

Officials said the reconstruction of the nation's foreign trade system would be accomplished "without haste or preference."

At the same time they indicated the Italian government was in no hurry to accept an invitation to join other Locarno treaty signatories in a conference concerning Germany's renunciation of the Rhineland and the possibilities for a new European peace structure.

As for the nation's new foreign peace structure, two basic points were suggested:

1. Nations which desire to sell to Italy must buy from Italy;

2. Nations wishing to sell to Italy must not compete with products already provided by Italian agriculture and industry.

Italy's position on these two last points was described by Virginio Gayda, authoritative editorial writer, as more secure than before the Italo-Ethiopian war with its consequent imposition of sanctions.

## Broadcasting Vimy Service

Commentator Will Describe Unveiling Of Canada's War Memorial

London.—The ceremony of the unveiling by His Majesty the King of the Canadian war memorial at Vimy Ridge in the presence of the president of the French republic will be broadcast by the BBC from the empire station at Davenport.

The actual ceremony by the king will take the form of unveiling a figure at the base of the memorial.

Both the English and French languages (the latter for the benefit of French-Canadians) will be used in the service, which, together with the historical proceedings, will be described by a commentator. All those who are associated with the broadcast will be dressed in white, in order that they may be in harmony with the white stone of the memorial, and will be as inconspicuous as possible, so as not to detract from the spectators' interest in the ceremony. It is expected 100,000 will be present for the unveiling.

## Ordered To Take Rest

British Foreign Secretary Gave Up Duties For Week

London.—Foreign Secretary Eden, who more than a year ago was forced to lay aside government duties for a month to recuperate from heart strain, was ordered by his physician to take a week's rest.

A foreign office announcement stated: "Mr. Eden, on the advice of his doctor, has decided to take a week's rest in the country. Viscount Halifax (Lord Privy Seal) will act for Mr. Eden in his absence."

It was not known whether the rest was made necessary by a recurrence of the heart ailment, but visitors at Whitehall and members of parliament recently have noted the foreign secretary's face appeared drawn and that he seemed overtaxed.

## Doukhobors Sentenced

Sent To Penitentiary For Parading In The Nude

Nelson, B.C.—Paul Melin and Bill Violett were sentenced to three years in the penitentiary after admitting to Magistrate John Carmel they had paraded in the nude near Brilliant, B.C., on July 1.

The two Doukhobors would not plead guilty but admitted they had paraded. They said they might be guilty in man's eyes but not in God's sight. They denied the stripping was done deliberately and defiantly, stating they were obeying only the laws of nature.

Both men have served previous terms for nude parading.

## British People Optimistic

High Commissioner To Canada Sees End To Depression

Ottawa.—Sir Francis Floud, British high commissioner to Canada, just returned from a two-month visit in the United Kingdom, said the people there were optimistic and that there was every indication the depression was at an end. Sir Francis said in some sections there was an actual shortage of labor.

Only in south Wales a more or less discouraging situation existed because the whole population depended on the single industry of an extractable coal mining, the export for which was diminishing.

## How To Keep Cool

Medical Officer Issues Advice For Coping With The Heat

Toronto.—As thermometers soared to new record highs, Dr. Gordon P. Jackson, medical officer of health, issued advice here for coping with the heat.

"Take plenty of time and keep in the shade," he said. "Above all, forget the heat. Don't worry about it, because those who worry get hot. Have your clothing of a light color and texture, and don't have too much of it."

"Drink sufficient quantities of water or fluids. It is, however, a good practice not to make meals entirely of food or abnormally cold articles of diet. I would advise at least some warm nourishment daily."

"Tepid sponges always reduce over-heating of the body. Keep your windows open but have them screened."

## PLANE FLIGHTS TO ASSIST WORK OF WEATHER BUREAU

Washington.—Weathermen soon will begin making daily plane flights at five important "blind spots" on present North America weather maps to enable the weather bureau to make more accurate forecasts based on upper air conditions.

Weather bureau officials said that in addition to the 23 stations at which high altitude recordings are now made—daily flights will be started at Miami, Fla.; Sault Ste. Marie, Mich., and Salt Lake City, Utah, on August 1, and at Oakland, Cal., on Sept. 1.

An aeroplane weather observer also will begin daily flights at Fairbanks, Alaska, on Sept. 15 and continue until March 15.

The Fairbanks flights, officials said, will be made to study the cold waves that sweep out of Alaska every winter and chill extensive areas in the United States.

The Canadian government is co-operating in the studies and is considering establishing a similar station at Ft. Smith, Northwest Territories, officials said.

The weathermen make the daily flights at an altitude of 17,000 feet to gather information on temperature, pressure, humidity and other conditions on which to base analyses of air structure.

Weather officials explained that plane observations were necessary to study the polar and tropical air masses high above the earth's surface. By means of the observations, the top of cloud layers, the extent of icing, and other important air conditions are also determined for the safe operation of aircraft through and over cloud masses.

## World Youth Congress

Ottawa.—Paul Martin, Liberal member of parliament for Essex East, will be acting chairman of the Canadian delegation to the World Youth congress at Geneva which opens August 31. It was announced here by the League of Nations' Society in Canada.

"DON'T PLAY TOO HARD, KELVIN"

Three-year-old Kelvin Rogers is shown above as he played with his dog near the home of friends at Germantown, Pa., apparently recovered from the delicate operation in which a nail was removed from the lung. Mrs. Rogers brought her son from Philadelphia where surgeons used the only available bronchroscope to perform the operation.

## RETIREES FROM SENATE

Senator Patrick Burns has forfeited his seat in the Upper Chamber because of illness. Senator Burns has been too ill to attend the last two sessions of the Senate.

## To Stabilize Prices

Set Price Beyond Which U.S. Wheat Cannot Rise

Chicago.—A "price ceiling" beyond which United States grain prices even in a drought year cannot rise has been established by importation or threat of importation of foreign commodities into the United States over the tariff wall, market specialists asserted.

Reports current in the trade were that domestic wheat prices were rapidly approaching a basis at which increased volume of Canadian wheat could come in over the 42 cents a bushel tariff barrier.

Last year approximately 35,000,000 bushels of the Dominion's grain was imported after rust cut the United States spring wheat yield. Whenever the United States price advances to levels at which it is profitable to import wheat, more of the Canadian grain finds its way across the border for milling purposes. This circumstance acts as a "price ceiling" and was to some extent responsible for the recent setback in wheat, traders said.

## Studying Fishing Industry

Minister Of Fisheries Spending Some Time On Pacific Coast

Ottawa.—Hon. J. E. Michaud, minister of fisheries, has gone to Vancouver to make a complete study of the Pacific coast fishing industry. Accompanied by W. A. Found, deputy minister, he will spend about six weeks along the west coast as he is anxious to familiarize himself with fishing conditions from the United States border to the most northerly areas.

During his western trip the minister will likely settle Canada's attitude towards the sockeye salmon treaty and the conditions attached to it by the United States senate.

## May Visit West

Ottawa. Prime Minister Mackenzie King said he "hopes" to make a trip west as far as Vancouver during August before he leaves in September to head Canada's delegation to the League of Nations' meeting at Geneva.

## Famous Yacht

King George's Historic "Britannia" Ends Career In Dramatic Finale

Cornwall, Eng.—Dramatic in white daisies and red roses, King George's historic "Britannia," once queen of the world's racing yachts, pulled out of her slip, bound for a peaceful burial at sea.

She plunged to the bottom of the channel at midnight in a dramatic finale to her 43-year racing career.

Many members of her old racing crews visited the "Britannia" during the day, to take a last look at her trim lines and rigging.

In accordance with the terms of King George's will, which specified she was to be destroyed if neither the new King Edward nor his three brothers desired to use her, the famous yacht was scuttled not far from the scene of her many triumphs.

Attempts to preserve the aged champion proved in vain.

When King Edward, never much of an enthusiast for yachting, and his brothers all signified they did not wish to take over the yacht, England's foremost yachting clubs sought permission to buy parts of her and engrave them on their club grounds.

The terms of the late monarch's will, however, precluded this.

King George frequently sailed her with his own hand, at times taking his place with the crew in hauling on the mainsheet or testing the finest webbing of steel wire—shrouds, stays, back stays and runners—which held aloft the great 102-foot mast and which transformed the slightest breeze into the music of a giant harp.

## Makes Air History

King Edward Flies Own Private Plane To Inspect R.A.F.

London.—The king made air history flying in his own private plane to make an inspection of several stations of the Royal Air Force.

He was accompanied in a flight from Windsor to Norfolk and later to Wittering by the Duke of York; he-impresario to the throne.

One of the royal air force officers who performed stunts in the air before the king was Flying Officer MacLachlan, a 24-year-old Canadian.

## PRIVY COUNCIL TO TEST VALIDITY OF LEGISLATION

Ottawa.—The highest judicial tribunal in the British empire will be asked by Canada to determine validity of four legislative enactments all directly affecting labor, it was announced.

They are items in the "reform legislation" brought down by the Bennett administration. Hon. Ernest Lapointe, minister of justice, announced the judicial committee of the privy council would be asked to pass upon the constitutionality of the Employment and Social Insurance Act; and the acts which call for one day's rest in seven, 48-hour week, and payment of minimum wages.

Coupled with the announcement that Canada will appeal these four enactments was Mr. Lapointe's statement that provinces would submit references to the privy council concerning the validity of section 498A of the criminal code, and the Farmers' Creditors Arrangement Act.

Only two of the eight "new deal" enactments were not directly mentioned in the minister's statement. They are the Natural Products Marketing Act and the Dominion Trade and Industries Commission Act.

The marketing act was regarded as one of the most important pieces of legislation among the eight bills recently passed upon by the supreme court of Canada. The court declared ultra vires the Canadian parliament. It found partly valid the Dominion Trade and Industries Commission Act.

What the government will do in respect to the Market Act, remains, therefore, a mystery. Since it was turned down definitely by the highest court in Canada, the supposition is that some effort will be made by amendment to render it workable.

If in its present form, the act is without Dominion jurisdiction, it may be the government preferred not to risk an additional judgment against it if modification might bring it within the federal ambit.

The Dominion Trade and Industries Commission Act was found partly valid by the supreme court and this may also be dealt with by amendment, although, again, no information of an official nature is available.

## UNITED STATES IS OUR SECOND BEST WHEAT CUSTOMER

Ottawa.—The United States now is Canada's second best wheat customer and sales to that country are continuing at the rate of about 1,000,000 bushels a week. Short crops in the United States last year and prospects of short crops in Canada as well as the United States this year have kept United States buyers in the Canadian market.

The present relationship of cash wheat prices in the two countries is regarded here as favorable to continued export. Canadian wheat entering the United States has to pay a duty of 42 cents a bushel and the spread between cash wheat in Canada at Minneapolis and Winnipeg goes a long way towards taking care of the duty.

United States customs figures show that about 4,500,000 bushels of Canadian wheat entered the country so far this crop year or since Aug. 1, 1935.

It imports maintain their present rate for the next four weeks the total for the crop year 1935-36 will be close to 50,000,000 bushels, compared with 25,000,000 in the crop year 1934-35.

This volume of wheat purchases puts the United States second only to the United Kingdom as a buyer of Canadian wheat.

All of this wheat entering the United States pays the 42-cent duty but some of it is milled in bond and re-exported as such when the duty is rebated. On the remainder which is consumed in the United States there is no rebate.

## To Satisfy Italy

France Ends Naval Assistance Agreement With Britain

Paris.—France officially announced termination of the Mediterranean mutual assistance agreement with Great Britain.

Officials said the government had informed Great Britain and Italy that it had considered the arrangement promising her assistance in the case of an Italian attack on the British fleet ended when sanctions were lifted.

France's action, it was indicated, was an attempt to satisfy Italy and win her participation in the forthcoming Locarno conference at Brussels, as well as in the Dardanelles conversation now in progress at Montreux.

The agreement was reached shortly after the league instituted sanctions against Italy. It promised French aid and the use of naval bases in the Mediterranean in the event of a clash with Italy.

Officials said the French ambassadors communicated the decision to London and Rome.

Diplomatic sources declared France had discussed the question with Italy before reaching a decision. They said Italy indicated if France rescinded the Mediterranean agreement, she would send a letter guaranteeing France against German attack as called for in the Locarno agreement.

## Coronation Plans

Committee Appointed To Make Arrangements For The Event

London.—The first meeting of the committee recently appointed to make arrangements for the king's coronation, next May, was held here with the Duke of York as chairman.

Among the 42 members present were the Archbishop of Canterbury, Sir John Simon, home secretary; Viscount Halifax, lord chancellor; Prime Minister Baldwin; Major Clement Attlee, Labor leader; and David Lloyd George, Liberal leader.

Five members were elected to form a special permanent committee.

## Trans-Atlantic Air Mail Soon

Toronto.—Trans-Atlantic air mail by 1938 was predicted by Hon. J. C. Elliott, postmaster-general of Canada. In an interview he said the Canadian government was studying possibilities of air-mail over the Atlantic and also with Pacific countries. Canada was on the shortest route between Europe, Asia and Australia and the government hoped to get this business, he said.

## Many Passports Issued

Ottawa.—Indicative of a great exodus of Canadians to Europe, more than 5,000 passports were issued in July, largest number in five years, it was announced. This was apart from persons travelling on passports previously issued and the 6,125 special passports issued free to the Vimy pilgrims.

Once will be glad to answer your Radio Questions. Address here in care of the Chronicle.

The article appeared in The Toronto Globe, Wednesday, June 24, 1936, at the instigation of the Radio Manufacturers' Association of Canada.

**BARGAINS? Cheap U.S. Radios Risky Purchases, Expert Claims**

AS A METHOD of buying a midget radio at a bargain, the Bring-Back-What-You-Like-Up-to-\$100 plan has fire sales whipped by several miles.

For under the recently revised customs regulations of Canada, any citizen who is willing to visit across the border for two days, and has a large enough imagination, can bring a radio back in his suitcase among other "personal effects."

And they're flooding into Canada like schools of salmon rushing upstream to spawn.

A very fine bargain for \$6 to \$10! That is, providing the purchaser doesn't mind taking a few chances, such as the following:

1. His child may be killed from shock.
2. His home may be burned.
3. All his fire insurance may be voided.
4. He may be prosecuted, fined or imprisoned, especially if he sells the radio.
5. He is liable to Canadian patent owners for damages.
6. He mustn't mind static resembling a conference of tomatos.
7. Last, be willing to forget he is helping to put 25,000 Canadians out of jobs.

**Experts Helpless**

This warning is far from a joke, Canadian radio experts told The Globe last night. Human life and property are menaced, they claim and apparently they are helpless.

Returned only yesterday from Ottawa, where he had interviewed the Hon. Charles A. Dunning and other Cabinet Ministers, George F. Brooks, Executive Vice-President of the Canadian Radio Manufacturers' Association, said no aid, for the present at least, can be expected from the Federal Government.

"We could build radios to sell at the same price as these, but we're not allowed to," Mr. Brooks declared.

"We must build according to rigid requirements. For instance, the sets under question have no transformers. There is great danger in using such sets, as anyone handling them may receive a shock of full 110 voltage. There is a real fire hazard, too.

**Dealers Restrained**

"The odd part of it is," and he shook his head, "no dealer can bring one in and sell it. It is against the law to sell these substandard sets. Yet anybody can bring one in, absolutely free of duty, and use it."

"Is there any possibility of the tariff being modified?" Mr. Brooks was asked.

"No, Mr. Dunning said the Government wanted to give the public a break," was the reply.

Incidentally, Mr. Brooks cleared up one vexing problem connected with the "tourist" privileges, during his Ottawa trip. He learned, definitely, that console radios, even if under \$100 in price, were not duty free.

Presumably, similar regulations applied to other large articles, he said.

(Ed. note) Owing to unavoidable delay the 8th article on "Radio Interference" cannot be published until next issue.

**A COLD DESSERT FOR A HOT DAY**

Young appetites sometimes suffer during the hot summer months, and anxious mothers are hard pressed to see that their children get proper nourishment in an easily digestible form. Since milk is, in itself, an almost perfect food, tasty, chilled milk desserts will prove a valuable addition to the menu. Here is one that will tempt even the most jaded appetite:

- Chocolate Ice Cream**  
(Freezer)
- 2 Rennet Dessert tablets
  - 2 tablespoons cold water
  - 2 ounces chocolate
  - 3 cups milk
  - 1 cup heavy cream
  - 1-4 cups sugar
  - 1 teaspoon vanilla flavoring

Dissolve Rennet Dessert Tablets in cup with two tablespoons cold water. Melt chocolate over hot water and add 1-4 cup of the sugar. Add milk and cream, a very little at a time, stirring until smooth after each addition. Add rest of sugar and vanilla flavoring, and warm to luke-warm—not hot. Add dissolved Rennet Dessert Tablets. Turn at once into a freezer can, let stand in a warm room until firm—about 10 minutes. Then cool. Pack in ice and salt, and freeze.

- Nova Scotian Punch**
- 1 quart water
  - 2 cups sugar
  - 2 cups chopped pineapple
  - 1 cup orange juice
  - 1-2 cup lemon juice

Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool strain and dilute with iced water if necessary. Either fresh or canned pineapple may be used.

## Importance Is Stressed Of Taking Plenty Of Rest To Relieve The High Tension

No subject is more timely than the importance of rest, for there are probably more tired people in the world today than ever before. Nervous exhaustion has taken the place of the old-fashioned stomach-ache as the prevailing complaint of the times. The direct result of our strenuous life is that everywhere people are skimping on sleep.

Before dwelling on the subject of sleep I should like to point out that considerable rest may be obtained even though actual sleep does not take place providing one gives himself the proper opportunity. Many people have found that a few minutes relaxation even without sleep restores body vigour and enables one to carry on any particular problem with which they may be concerned.

It has been stated that man is the only animal who does not sleep after a meal. Most of us take a meal and immediately start in to work where we left off. Ten or fifteen minutes complete relaxation after a meal is well worth the apparent loss of time.

No doubt many of you know people who can completely relax for a comparatively short period of time, ten to twenty minutes, and start in as refreshed as if they had had several hours in bed. To those of you who are working at high tension let me advise breaking the tension with relaxation at periodic intervals during the day.

During the last war on marches the customary thing was to march for a period and rest for a much shorter period, and it was found that a greater distance could be traversed in this way than by keeping right straight ahead for a longer and more continuous march.

Let us now consider just how much time we do spend in sleep. The ordinary man, without knowing it, in the course of an ordinary lifetime, spends about as much time in slumber as Rip Van Winkle. The following table shows how much time the average person has to sleep, if he spends the normal amount of time in that way, and if he lives to the ripe age of three-score and ten.

When you are a child, and see that you henceforth get what is commensurate to your age.

If you are twenty you will sleep 16 years, 8 months, 3 days and 8 hours. If you are now thirty you will sleep 13 years, 4 months, 1 day and 16 hours. If you are now forty you will sleep 10 years, 8 months, 3 days and 8 hours. If you are now fifty you will sleep 8 years, 4 months, 1 day and 16 hours. If you are now sixty you will sleep 6 years, 8 months, 3 days and 8 hours. If you are now sixty-five you will sleep 5 years, 8 months, 3 days and 8 hours. If you are now seventy you will sleep 4 years, 8 months, 3 days and 8 hours. If you are now seventy-five you will sleep 3 years, 8 months, 3 days and 8 hours. If you are now eighty you will sleep 2 years, 8 months, 3 days and 8 hours. If you are now eighty-five you will sleep 1 year, 8 months, 3 days and 8 hours. If you are now ninety you will sleep 8 months, 3 days and 8 hours. If you are now ninety-five you will sleep 6 months, 3 days and 8 hours. If you are now one hundred you will sleep 4 months, 3 days and 8 hours.

It is not with the desire to encourage ideas that we point to the necessity of the average man and woman with responsibilities taking the normal eight hours' sleep per night as advocated. Rather it is because the conditions which modern life impose on us tend to lead us to cheat ourselves of that reasonable amount of sleep which is necessary if the human system is not going to get out of gear. Compared with animals, human beings have few natural resting habits and dispositions. That is partly because of our more active brains; the mind is constantly making suggestions for further activity. For many reasons man is a very restless organism; and the tax is apt to be nervous exhaustion. As someone has said, "If you would live long, you must live slowly."

You are apt to read many things on the subject of sleep that you will find confusing. For instance, one of the greatest men of our time, Thomas Edison, did his very greatest work at an advanced age and yet he indulged in only 4 hours' sleep per night; and 4 hours was the allowance which Napoleon permitted himself. But the latter's experience differed from that of Edison, for he was burned out early in life. He died of cancer, it is true, and while we do not know yet that there is any relation between cancer and nervous exhaustion there is reason to believe that his later battles and campaigns were lost by a man whose nervous energy was exhausted.

As well as sleeping the normal eight hours every night, it is important that one should sleep well. So to that end a few suggestions are offered. Regular hours are an important factor in the matter of health. Many people who suffer from insomnia have a lack of punctuality to blame for

their suffering, and of all ills that can be inflicted upon one there is nothing quite as dangerous to the nervous system as insomnia.

If one is inclined to be early one evening and late the next, the brain is likely to decide that the late hour is the one which it will select for falling asleep. If one will select a certain hour each night as the time for going to sleep the nervous system is likely to respond automatically. Shakespeare said, "How use doth breed a habit in a man," and whether he knew it or not, he was referring to the quiet automatic way our nervous systems adjust themselves to our usages.

It is a mistake to doze off in the evening before definitely going to bed. This takes us to bed in a state of mind that is half-asleep and half-awake, so that it is difficult to have complete sleep when bedtime comes. As the digestive system requires rest, and takes it best while we sleep, it is unwise to indulge in late suppers. There should be an interval of at least an hour and a half to two hours between the last meal and the time of going to bed. It is, however, a good plan for people who have difficulty in getting to sleep, to take a warm drink the last thing before going to bed. It should not, of course, be a nerve-stimulant such as tea or coffee.

Upon consideration of the facts we have already given you, of how many of the next few years you are likely to spend in slumber, it is perhaps not out of the way to make a suggestion or two about the beds we use, the clothes we wear and the room in which we sleep. About the beds—they should be neither too hard nor too soft. The person who reports he is "just as tired when he wakes up as when he went to bed" is likely a heavy man who is sleeping on too soft a bed. On the other hand the bed should not be too hard, or the body cannot rest properly.

Perhaps the bedclothes are too heavy; it should be remembered that an elderdown quilt, of the type that almost everyone uses, is worth several blankets in warmth. The clothing of a person at night should be light, but should give adequate warmth. It is important that the feet be kept warm. Good ventilation in the room you use for sleeping is very important. It is a good plan to pull the bed away from the wall a few inches to insure free circulation all around.

One is often asked which is the best position in which to sleep. This is a matter of no importance, up to the position of the body is constantly being changed through the night. Little by little, at intervals of from twenty to forty minutes the position is shifted, so that you may never completely "over several times in the night and yet be ready to swear you never moved. So you need not worry about the position in which you sleep; the body will attend to itself for itself.—Health League of Canada.

### Products Of The Farm

Exert Great Influence In Balancing Of Canada's Indebtedness

Five million Canadians are employed in farming, and a further number depend entirely on farming for their subsistence. James C. Parmlee, Deputy Minister of Trade and Commerce, pointed out recently. Unfortunately this latter number varies with the prosperity of agriculture, and the decrease in urban employment as agriculture is depressed, contributes an important factor in our relief problem of today. From 25 to 35 per cent. of our railroad freight comes directly from the farm. On a ton-mile basis, because of the long grain hauls, about 50 per cent. is attributable to agriculture. Again 40 to 50 per cent. of our total export trade is made up of products of farm origin and this is a prominent influence in the balancing of Canada's indebtedness.—Country Life in B.C.

### According To Scientist

Retaining one's beauty it seems is not such an easy task. A Smithsonian Institute scientist has taken thousands of measurements and demonstrated that as a person grows older his nose becomes longer and wider, his ears lengthen and his mouth widens.

The University of Pennsylvania has a butcher's bill in the form of a tiny bit of baked clay. The bill is for three lambs delivered to the city of Ur, forerunner of ancient Babylon, and was presented about 2500 B.C.

"May I use your phone? My wife told me to ask you for a rise, but she forgot to say how much!"—MacLean's.

### Setting Good Example

Owners Of Jersey Cattle Have Attractive Advertising Sign

At the annual meeting of the Canadian Jersey Cattle Club in Toronto in February this year, special fieldman William Hunter showed the assembled members a sample of the big farm signs which had been designed to indicate those dairymen who are producing special Jersey milk. It was a big sign done in golden yellow with black lettering and hung on a strong metal pipe and the wording shows that the farm outside which it stands ships "trade-mark" milk to a distributor in Toronto who sells it as "special" Jersey milk at a special price.

A large number of these signs have now been erected and travellers along many highways within 75 miles of Toronto have been remarking upon their attractiveness. In every case they stand at the gate of a neat and prosperous-looking farm, with house and buildings indicating that a superior type of farmer lives there. Their Jersey milk brings them a premium for quality and whether one believes all that is claimed for high-fat milk or not, the Jersey selling idea is evidently "getting across" with the consumer, for it is beginning in extra returns to their producers.

The Canadian Jersey Cattle Club some years ago secured a patent for the exclusive use of their neat little six-sided sign with the Jersey head in the middle. Slowly but surely they have been campaigning to get city distributors to pay extra for milk from the bed away from the wall a few inches to insure free circulation all around.

"Didn't you guarantee that the horse wouldn't shy before the discharge of cannon?" asked a cavalry officer of a horse dealer. "Yes, and I'll repeat it. He never shies until after the cannon is fired!"

"And why do you think the air is more enjoyable in the summer time?" "Because of the number of programs that get off it."

### A Scrap Quilt Is Always Popular

This "Nosegay" quilt provides fascinating pick-up work for evenings when friends drop in. The blocks are fun to piece because of the variety of materials you'll use—each block different—each block an adventure in patchwork. See what fetching use it makes of otherwise useless scraps. A real nosegay you'll have, with its colorful pieces; a pastime well worth its while, and a quilt you'll always be proud to show!

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to: Household Arts Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

## Preparations Being Made In Britain To Establish Transatlantic Air Service

### Gloves Will Not Protect

Criminals No Longer Sure Of Not Leaving Finger Marks

No longer will the scrupulously gloved hand of the criminal protect him from his fingerprint expert at Scotland Yard, head of the Superintendent Battley, head of the Anthropometric Department.

A system has been devised by him which reveals any microscopic mark left by a glove on wood or metal, so that the glove which has made the mark can later be identified. It was Battley who some years ago invented the single fingerprint system.

His new method allows prints which otherwise would not have been discovered to be brought to light by secret processes.

There have been several recorded cases in Britain and abroad in which fingerprints have been traced from a hand which was wearing a glove, and it is believed that this method may develop to an extent far beyond what has already been achieved. At present much depends on the type of glove used and the surface on which the imprint is made.

The fingerprint department is becoming one of the most important at Scotland Yard. Last year 21,767 identifications were effected from 85,899 sets of fingerprints sent for search.—New York Times.

### Lower Marine Rates

Vessels Sailing Into Hudson Bay To Be Insured At Less Than Half Of Former Cost

This season, ships navigating through the Hudson Strait to Manitoba's ocean port of Churchill, will be insured at rates considerably less than half those of the first two years of the port's operation.

Minimum rates in effect for ships equipped with gyro compasses have reached a point where the premium for carrying 253,000 bushels of wheat, 5,000-ton ship worth \$250,000 is \$3,115, taking the pound sterling at \$5. In 1932 and 1933 it would have cost \$7,500 to insure the same ship. Indemnity for such a vessel was reduced to \$4,150 and last year it dropped to \$4,685. There has only been one marine casualty since Churchill was opened. The steamship Brighten, Pan. owned, sank far off her course in the strait after striking an iceberg in 1932.

The Brighten Pan. struck Oct. 1, and sank 18 miles northeast of Wales Island. A 2,307-ton vessel, she was carrying 253,000 bushels of wheat. Her crew of 30 took to boats and was picked up by the ice-breaker N. B. McLean. No one was lost.

### Weather Changes

Canadian Scientist Says Dry Periods Always Followed By Moisture

J. Patterson, head of the meteorological service in Toronto, queried about the statement of Henry Wallace, United States secretary of agriculture, that the possibility of a "weather change" might make the United States an arid land, said Canadian scientists could point to records dating back 100 years which indicated dry periods were always followed by moisture.

"We know there are general fluctuations in the climate going on all the time," said Mr. Patterson. "Some may be over long periods, others may be short. Since the normal rainfall in the west is not much more than sufficient for agriculture, it means that the variation from that does not have to be very great to produce drought in one case, growth in the other."

"All we can say is that the previous periods of drought passed away and we have no reason to suppose the same conditions will not hold again."

Mr. Patterson agreed with the secretary that a thorough study should be made of the drought problem, using every means at the command of the weather service.

### A Mysterious Lake

Lake Wakatipu in New Zealand heaves like the beating of a heart with perfect regularity. The rise and fall of the water is about three inches every five minutes, and no satisfactory explanation of the phenomenon has ever been found.

This beautiful lake in South Island is shaped like the letter S, and is 62 miles long and three miles wide.

Sometimes a man is unable to make both ends meet because he keeps them headed in opposite directions.

A new British air centre is in the making while mechanics tuned up the first flying boat of a proposed trans-Atlantic fleet.

The giant four-motored plane, prototype of the airliner with which Britain hopes to establish a trans-Atlantic service, made its first appearance on the slip-away at Rochester recently. Others are nearing completion.

The actual work of making Langstone harbor a combined land and marine base for empire and trans-Atlantic routes is expected to begin in another month.

Early next year, it is being predicted at Portsmouth, a service to North America will be under way, with two British and two United States flying boats arriving and departing weekly.

The Portsmouth town council has already approved the project of the airport, but the largest of its kind in the world and to cost close to \$5,000,000.

Government financial assistance is practically assured, some of it at least, from the proposed new air navigation bill with its provision for a 50 per cent. increase in air subsidies to \$7,500,000 yearly.

For Portsmouth the new airport would mean distinction as the air hub of the world, Langstone harbor, which has Portsmouth harbor to the west and Chichester harbor to the east, would become a large inland lake. Several hundred acres of ground would be prepared for the handling of land planes.

Britain's first efforts toward trans-Atlantic service are expected to be directed at Bermuda via the Canary Islands, with the North Atlantic crossing to be attempted later.

Expansion within the empire air service proper this year is to include substitution of Imperial Airways' flying boats for Australian planes from Singapore to Australia; use of flying boats on a service along the east coast of Africa instead of flying over Central Africa with land planes; more efficient services in general through leased subsidies, and carrying of all first class mail by air without surcharge.

### When Law Was Savage

England Thought Nothing Of Hanging People For Minor Offences

In the Middle Ages, for example, in 1614-15, the year before William Shakespeare died, 418 persons were tried and 160 were condemned to death. Of these 100 were duly hanged. The remainder escaped by pleading their clerkship, that is, that they could read and write. Now the population of London at that time was probably a quarter of a million. In the year 1929 the population of Great Britain was more than 45 million as large. Yet in 1929 there were thirteen people hanged for murder in the country. If the law today were as savage as under James I, they would be hanging 15,000 people in Great Britain every year.

But it was not murder in Shakespeare's England. As the detailed figures show, Englishmen then as now, were not particularly addicted to murdering their neighbors. Over this story the Manchester Guardian puts the aridonic head, "Merrie England."—New York Times.

### Sales Of Radio Sets

Probably the sales of no other device has climbed so rapidly as has those of the radio. Although comparatively new the radio has become a very common part of the equipment of almost every home in Canada. There were just under 29,000 receiving sets produced in Canada during the first three months of 1936. At factory prices these are valued at considerably over a million and a quarter dollars, an increase over the corresponding period in 1935 of 22 per cent.

The Smiths are on the balcony and can hear what a young couple are saying in the garden below.

Mrs. Smith: I think he is going to propose to her. We ought not to listen. Whistle to him.

Mr. Smith: Why should I? Nobody wanted to warn me.

Sergeant, to nervous soldier: "Pull yourself together, man! You said yourself that all your glorious ancestors died fighting!"

Nervous Newcomer: "Yeh, that's what makes me nervous."

**THERE IS Smoking Satisfaction IN EVERY PACKAGE**

**Buckingham FINE CUT**

## WORLD HAPPENINGS BRIEFLY TOLD

More than 3,500 school children in the unorganized districts of Manitoba had their teeth fixed during 1935 by travelling dental clinics.

A super-sleeper, which can be fitted to aeroplanes, motor cars, motorcycles and buses has been invented to eliminate street traffic noise.

Elsie Janis, actress and "idol of the army" during the Great War, has announced her intention of giving up all her "worldly possessions" and devoting her life to charity.

Hope that in another five years Canada's annual gold production would reach \$200,000,000 was expressed at Sault Ste. Marie, Ont., by Hon. T. A. Crerar, Dominion minister of mines.

The Soviet government has presented an official demand to Japan to call a halt to poaching by Japanese fishing vessels in Soviet waters off the Kamchatka peninsula in far eastern Siberia.

A portion of the remains of a giant mastodon which roamed this country about 1,000,000 years ago, has been unearthed on the estate of Conrad J. Osman, near Hillsboro, N.B.

Order-in-council published in the Alberta Gazette carries revisions to the Optometry Act, ordering that optometrists cannot offer free examinations of eyes, engage in misleading or price-reference advertising, or offer premiums or refunds.

The government jobbreaker N. P. McLean has left Quebec for her annual voyage into the north, where she will guide freighters in and out of Hudson's Straits. Before entering the straits, the vessel will be used for survey work around the Straits of Belle Isle.

One of the largest consignments of butter ever routed via Vancouver was recently shipped from Alberta and Saskatchewan. The shipment totalled 794,000 pounds, was packed in 14,000 boxes and to transport it 25 railway cars were required. It will be sent to Great Britain.

### Butter Awards

**Biggest Creamery Butter Show Ever Put On At Calgary Exhibition**

Manitoba and Alberta creameries furnished the competition in the biggest creamery butter show ever put on at the Calgary exhibition. Awards released show Manitoba creameries taking 29 prizes for butter made in May—four firsts, 18 seconds and seven third group prizes—against 27 taken by Alberta creameries—six firsts, 17 seconds and four third group prizes. There were 60 prize winners in this class. For June butter there were 83 winners listed, with Manitoba having 39—six firsts, 25 seconds and eight third group prizes—and Alberta 36—eight firsts, 25 seconds and no third group prizes.

While there was no sweepstakes award an Alberta creamery, the Stetler Creamery, had a score for the two classes of 192.9 to stand high. The St. Lazare Creamery, of St. Lazare, Man., and the Northern Alberta Dairy Pool, Wetaskiwin, tied for second place with 193.8. Saskatchewan, B.C. and Quebec dairies had a few entries. Mrs. H. C. Taylor, Headingley, won the dairy butter class.

### Soviet Newspapers

More than 10,000 newspapers in 66 languages are published in the Soviet Union. This aggregate circulation reached 37,000,000 copies in 1935, whereas this year it increased to 39,000,000 copies. Books and magazines are now issued in more than a hundred languages.

Elephants cannot trot or gallop. A walk and a shuffle are their only gait.

## U.S. Drought Conditions

**Underground Water Supplies Shown To Be Seriously Lowered**

Reports that the drought had seriously lowered the underground water table, an important source of moisture, prompted the United States geological survey to begin an intensive study of fluctuations in the Dakotas, Montana and Wyoming.

George Farrell, western regional A.A.A. director, said on his return to Washington from an inspection tour of the parched area, that there had been a very serious drop in the water table.

"The drought, while covering much smaller territory than in 1934," he said, "is far more dry, resulting in a very serious drop in the water table. Work projects for distressed farm labor contemplate a system of small dams which will do a lot of good in conserving surface water."

There were unconfirmed reports that over-pumping for drinking water and irrigation had sunk the water table below the point of capillary attraction to the root zone in some sections.

Oscar Melnsner, the geological survey's authority on underground water supplies, said field men in the drought area had been instructed to co-operate with army engineers in studying fluctuations.

Approximately 15 papers prepared on the subject for the American Geophysical Union, he said, had been sent to the government printing office. They are expected to disclose whether surface reservoirs may have to be constructed because of a decline in underground water supplies.

## Soviet Schools

**Communist Party Decide To Teach The Three R's Without Any Fills**

The Communist party has decided to cleanse Soviet schools of so-called advanced and scientific teaching methods and to restore the old-fashioned schoolmaster with complete and undisputed authority.

The teaching of pedagogy (child study) is to be abolished and all published books on that theory will be criticized severely by the official press.

The party edict followed upon a meeting of its central committee, where "scientific classifiers of children" were accused of instituting an imported bourgeois system dressed up in Marxist phraseology.

A published statement charged the purpose of their tactics was to attempt to carry out the theory of higher and lower classes and races, based on the fatalistic idea that the capacity of children depends upon biological and social factors, and their heritage.

Under the pedagogical system, the statement said, thousands of normal children have been classified as backward and segregated in special schools.

These schools are to be reorganized and most of the pupils returned to regular schools for normal children.

The practice of imposing "countless questionnaires and examinations" upon school children and their parents also is to be discontinued, the statement added.

## Cannot Identify Soldier

**Efforts Of Doctors' For Nineteen Years Are Unsuccessful**

What may be the last attempt to establish the identity of the "living unknown soldier," who has baffled scientists since he was taken to Paris just after the World War, is to be made by three eminent French psychologists. Nineteen years ago the man, whose name was believed to be Mangin, was found wandering in the streets of Lyons, France, dressed in soldier's uniform. He knew nothing about himself or his doings, and could not remember his name. Mangin was sent to an asylum, where he was questioned by famous doctors for year after year. Never once did they get a lucid statement from him. Meanwhile, men and women from all parts of France have claimed him as husband or father or brother. More than 200 letters have been received trying to identify him, but without success.

King Kong, the 30-foot giant ape of moving pictures, really was only a man-made toy, 20 inches tall. Trick photography made him appear as a hideous creature of enormous proportions.

Absent-Minded Professor (to secretary): "I am going down to the town and if by any chance I happen to return during your absence, keep me here till I come back."

If you think your arguments are so convincing try persuading the small boy that he ought not to have a pet dog. 2159

## FORMER CABINET MINISTER

Hon. Peter Veniot, member of House of Commons, who died at his home in Bathurst, N.B.

## Greetings From Namesake

**Halifax, England, Sends Parchment Roll To Nova Scotia City**

Greetings extended by the borough of Halifax, in the west riding of York, England, to Halifax, Nova Scotia, were delivered in the council chamber recently.

Artistically executed on parchment, the scroll was protected by a cylindrical leather case, and was presented to Mayor Cragg.

The address came to this country aboard the giant liner Queen Mary.

Although the Empire State Building juts nearly a quarter of a mile into the air, it can be swayed only one-tenth of an inch in the strongest wind that will normally blow in New York, which is a gale of 110 miles an hour.

## May Sell Buckingham Palace

**Offices And Business Premises Now Available For Sale**

Buckingham Palace, home of England's kings and queens for many years, may be sold as a building site for \$15,000,000.

Valuers have surveyed the palace and its 40 acres of grounds, and, if it is decided to sell, part of the latter will be preserved as a public pleasure ground. It is understood a city of London syndicate is interested in the scheme.

Owing to the changing character of the neighborhood, the possibility of giving up the palace as a royal residence first was considered by the late King George. He announced that he was agreeable to the sale of the site for building purposes.

It is known that the King prefers his present bachelor home at York House, St. James.

If Buckingham Palace is sold, the "Court of St. James" would once more become an accomplished fact, and not, as now, merely a courtesy term.

A new business centre in late years has grown up around Buckingham Palace. Already offices and business premises virtually encircle it. Grosvenor Place, Grosvenor Gardens, Buckingham Palace Rd., and other adjoining thoroughfares that were given over to residential purposes until the end of the war, now have been converted into offices and business chambers.

## Potatoes From Prairies

Potatoes from the prairie provinces are being marketed in Montreal, the shipments being induced by high prices prevailing. Ninety-pound bags of whites from Alberta realized \$1.65, or somewhat lower than the prices paid for Maritime stock.

## Crochet This Bag And Saucy Sailor

PATTERN 5343

Your Summer suit needs them—your print cries for them—these crocheted accessories which require so little time to make. If you're longed for a "sailor"—crochet one from this simple pattern. Its easy stitches are clearly explained, as is its blocking. Alternate stripes of plain and rib stitch are used for hat and bag alike, the latter boasting a novel "peep-hole" top. Make the set in cotton or linen thread.

In pattern 5343 you will find complete instructions for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Household Art by Alice Brooks

Colored String Makes Top-notch Accessory Set

## SUNDAY SCHOOL LESSON

JULY 19

**SOCIAL SERVICE IN THE EARLY CHURCH**

**Golden text:** He himself said, "It is more blessed to give than to receive." Acts 20:35.

**Lesson:** Acts 4:32-35; 6:1-7; 9:36-39; 11:27-30; 13:1-3; 17:1-9.

**Devotional reading:** Psalm 112: 5-10.

**Explanations And Comments**

**Sharing Possessions, Acts 4:32-35.** Commenting upon verse 33, Dr. John Gardner bids us not miss its true significance. Other riches, more precious than gold had been committed to the care of the apostles. "It was the Gospel of the Resurrection, the Gospel of life, of pardon, peace and joy, the Gospel of power, and this they gave as well as other things."

Among the members of the early Christian Church there was the greatest unity of spirit and purpose; as the proverbial expression has it, they were of one heart and soul; not one of them considered anything his personal property, they shared all they had with one another, as a translation. The giving up of possessions was voluntary (Acts 5:4)—each regarded his property as held in trust for others.

It is interesting to recall here what Aristides wrote to the Emperor Hadrian about the Christians of those days: "They rescue the orphan from him who does him violence, and he who has gives to him who has not without grudging. And if there is a man among them who is poor or needy, and he have not abundance of necessities, they fast two or three days that they may supply the needy with their necessary food."

As need for help arose among them, those who had lands or houses sold them and brought the amount received to the apostles for them to distribute. "Laid them at the apostles' feet" is a figurative expression which doubtless arose from the oriental custom of laying gifts at the feet of kings; it meant that the money was left in the apostles' control.

"There shall come a time from out this noise of strife and groaning."

A broader and a juster brotherhood.

A deeper equality of aim, postponing

A selfish seeking to the general good.

There shall come a time when each shall to another

Be as Christ would have him—brother unto brother" (Lewis Morris).

## Hindenburg's Trips

**Comment In British Press Over Airship Crossing Great Britain**

Flights of the German airship Hindenburg over strategic areas of Britain and Canada were again the topic of anxious comment in the British press.

On each of its four voyages so far, the Daily Express said, the Hindenburg has chosen different routes to cross Great Britain. It has crossed the industrial area of the Midlands and the naval shippards along the coast of the channel.

When it was in Canada on a recent trip, the paper went on, the ship hovered for quite some time over Prince Edward Island, and the ports of Saint John and Halifax. These two ports, it was pointed out, are the only ice-free harbors in the Canadian east coast, and both have dock facilities capable of accommodating warships.

## Construction Work

**Over Nine Million Dollars Expended On New Dwellings In 1934**

Although construction work in Canada, as in other countries, has been in the doldrums in recent years, a statement just issued by the Dominion Bureau of Statistics shows that in 1934, at the very ebb of the depression, expenditures on new dwellings in Canada amounted to \$9,307,913. If most of this expenditure was on modest homes, with an average value of five thousand dollars, it would account for 1,840 homes, and if these homes were built on fifty-foot lots, on both sides of the street, they would form an avenue of new buildings nearly nine miles long. More than half of this avenue would be occupied by Ontario homes; Quebec would come next, and British Columbia, Alberta, Nova Scotia, Manitoba, New Brunswick, and Saskatchewan would follow in the order stated.

Of the different classes of construction work in Canada in the year under review, that on streets and highways was much the largest, amounting to over 39 million dollars. The excellent roads which beckon the tourist to Canada are among the results of annual expenditures of this nature. Other large construction classifications were factories and warehouses, government and municipal buildings, and churches, church halls, and schools. The total expenditure on new construction was almost 116 million dollars, and over 70 million dollars were spent on alterations and repairs.

## Importance Of Gold Production

**At Rate Of Increase, May See Surpass Agricultural Products**

**In Value**

Hope that in another five years Canada's annual gold production would reach \$200,000,000 was expressed by Hon. T. A. Crerar, Dominion minister of mines, who, with Hon. C. D. Howe, minister of railways and canals, addressed the Sault board of trade on the eve of a trip to the mining areas at Michipicoten and Goudreau.

Gold production in Canada last year amounted to \$116,000,000, said Mr. Crerar, while total value of the nation's mineral production, including both base and precious metals, was \$222,000,000.

Mining development in Ontario is helping to bridge the gap between eastern and western Canada, he said, after being introduced by T. E. Simpson, formerly chief whip of the Conservative party in the House of Commons. While he ranked agriculture first among Canadian industries, in another 10 or 15 years, or perhaps sooner, mineral production might surpass it, Mr. Crerar said.

## Italy's Policy In Ethiopia

**Experts To Study The Resources Of The New Empire**

Italy's policy in Ethiopia will be "no gold rush but slow, steady, well-planned concentration," said Count Giuseppe Volpi, charged by Premier Mussolini with organizing branches of industries in large groups, including technical, scientific and practical experts, to study the resources of the new empire.

Six principles will govern the development, Count Volpi said. They are:

"Adequate preparation in advance so effort and money will not be wasted. Every enterprise will be protected, but there will be no monopolies, and there will be no harm-scurum rush of mushroom business men. No black army will be set up. The natives will be needed as workmen. The Italian race will be kept pure and every effort will be made to prevent co-mingling of the whites and blacks."

Count Volpi saw economic possibilities in coffee, cotton, wool and minerals.

## Long Distance Conversation

**Kelvin Rogers Speaks From Philadelphia To His Father In Australia**

Kelvin Rogers, three, who came to Philadelphia from Australia to have a nail removed from his lung, sent his voice 9,000 miles by wireless recently to greet his father and his dog at home.

Speaking over short wave, he told his father, listening 150 miles from Melbourne, that he was a good boy. Then he let out a lusty "roar" to greet his dog, Briar, in the down-under manner.

To prove that the nail was really out, it was dropped on a metal ash tray and the sound was heard in Australia.

A leader of men is one who sees which way the crowd is going and then steps in ahead.

## FIFTIETH ANNIVERSARY TRAIN

From the rear platform of the Canadian Pacific Railway's 50th anniversary train, The Dominion (upper oval) H. J. Main, general superintendent, Manitoba district, speaks into the microphone to the crowd assembled to cheer the jubilee event. With him are Mayor John Queen (left), Hon. John Bracken, premier of Manitoba; His Honor, W. J. Tupper, K.C., Lieutenant-Governor of Manitoba, who spoke in reply, and W. M. Neal, vice-president of the company's western lines. In giving the welcoming address, Mr. Main followed the precedent set 50 years ago, when the general superintendents met the sturdy pioneer train on its trans-Canada journey. Below are hundreds assembled in the Sir William Whyte park, opposite the station at Winnipeg, where Premier Bracken gave a brief congratulatory address where the Countess of Dufferin, C.P.R. engine No. 1, now stands wreathed in flowers instead of smoke. In the left foreground can be distinguished Mayor Queen, Mr. Bracken, Mr. Neal and the Lieutenant-Governor and three old-time railroaders: James Gooderham, who drove the first Canadian Pacific train from Calgary to Winnipeg in 1884; J. St. Leger Maginn and Andrew Murdoch, all of Winnipeg.

### Activities of Societies Etc. B.E.S.L.

Although the crowd was not very large, probably owing to heat, it sure made up for lack of numbers by its enthusiasm and if anyone thinks different, just ask the kiddies.

Owing to the dust and wind, adjournment was made to the Masonic basement for supper where a wonderful repast awaited all who cared to join us.

A delightful hour of sing-song was held after supper which was ably augmented by a party of our Comrades from Calgary representing the Canadian Corps Association.

Our grateful thanks are extended to all who contributed in any way, to make the picnic a success.

### NATIVE SONS & DAUGHTERS

Who's for the N.S. and D. Picnic? You are invited to be the guest of the Native Sons and Daughters at Bowness Park on Wednesday, July 29. Make it a point to be there. Louis Lennon says, "bring whatever you want for supper; Steve says, 'be prepared to swim, go boating, play softball, and dance.'" See Evan Gordon about a ride out, if you have no car. Special prices have been arranged for dancing. Your attendance will help make it the biggest and best picnic yet.

### SENIOR BASEBALL

The Senior Baseball team won the first game they have played since July 1st, when they defeated Dog Pound 8-3 at Dog Pound, Sunday afternoon, July 19. Russ James kept the Dog Pounders pretty well in hand and had good support. The Crossfield boys took F. Banta, Dog Pound hurler, for a ride, running wide in the sixth inning and scoring enough to cinch the game. Frank Blair and Fred Wilson each got a home run. This team is not the best that Crossfield can put in the field but manager Johnson is well pleased with the way they performed.

Crossfield and Dog Pound played again at the Picnic and Stampede, Wednesday, July 22nd.

### VILLAGE OF CROSSFIELD NOTICE

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Village of Crossfield will offer for sale by public Auction, on Tuesday, August 11th, 1936, at the hour of 2:30 o'clock in the afternoon, at the office of the Secretary-Treasurer, Crossfield, Alberta, the following lands:

LOTS	BLOCK	PLAN
19 and 20	4	4504 I
1	6	4504 I

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of title. Terms, cash.

Redemption may be effected by payment of all arrears and costs at any time prior to the sale.

Dated at Crossfield, Alberta, this 4th day of July, 1936.

**T. TREDAWAY,**  
Secretary-Treasurer

### District Echoes

Mrs. Sid Jones was a Calgary visitor Tuesday.

Frank and Earl Hopper left Sunday for Dog Pound.

Herbert Bliss and Betty Bliss are visiting with Mrs. Garwood.

The Carmichael family is spending a weeks holiday at Sylvan Lake.

Friday's Electric Storm killed two of F. Stoddarts steers in the Wm. Pines pasture.

Peggy and Nora Collins, of Calgary, are visiting with Miss Elaine Belshaw.

Mrs. Sharp and family are spending a few weeks camping at the Dog Pound.

Mrs. Hays of Olds visited with her sister, Miss Daisy Robinson, last weekend.

Miss Florence Cruickshank arrived home on the 5:30 bus Tuesday.

Mrs. T. Green and son, of Calgary, are visiting at the W. C. Spivey home.

The Gibson Children of Olds have been visiting old friends in the neighborhood.

Mrs. M. McRory returned last Friday from Winnipeg where she had been spending a holiday with her son.

Mrs. C. S. Casey and Patricia are holidaying at the Pacific Coast. They will visit Vancouver, Victoria, Seattle and San Francisco.

Jim Williams returned to Crossfield on Friday. Mrs. Williams and the family are spending a holiday in Calgary.

Dr. McClelland wrote to the Veterinary Civil Service Examinations Wednesday, July 8th, at Calgary.

Mr. and Mrs. Smith, of Chatham, Ontario, arrived Tuesday evening to spend a visit with their son and daughter, Mr. and Mrs. L. J. Smith, west of Crossfield.

Mrs. Smith, of Rocky Mountain House, and two young children are having an extended visit at the home of Mrs. Smith's parents, Mr. and Mrs. J. R. Laut.

Mr. and Mrs. M. N. Jones and young son returned last Friday after spending a short holiday at Nanton with the former's father and sister.

Mr. and Mrs. C. Christianson and daughter, Alice, who have been visiting relatives at Crossfield and Westward Ho, left this week for their home in Fairview, Montana.

W. J. Wood returned from Sylvan Lake Monday morning. Mrs. Wood and the family will remain at the Lake for a short holiday.

Mr. and Mrs. J. P. Metheral returned last week from an extended holiday in Ontario. Jim says the weather was extremely hot in Toronto when they left.

Canning vegetables this year? Consult Mrs. S. H. McClelland, or better still, try a packet of her Canning Compound and be another satisfied user.

Rev. P. C. McCrae, formerly a Crossfield Minister and son-in-law of Mrs. E. S. Halliday, has accepted a call to a New Westminster Church. Mr. McCrae will be missed by his parish at Macleod.

Married at Pro Cathedral, Calgary, on Monday, July 13th, Miss Gerie Brooker, daughter of J. H. Brooker, to Mr. James R. Davidson, of Black Diamond. The Rev. Dean Rags officiated.

FLASH We have had to hold until next week news received after the dead line.

### Madden Notes

From Our Own Correspondent

Miss I. K. Dawson has returned from Edson.

Mrs. D. B. Farquharson is visiting in Calgary.

Miss Norma Miller, of Olds, is visiting Miss Kate Lesak.

Madden Football Boys scored a victory over Dilbury in their return game.

Misses Hazel Havens and Helen McEachern were Calgary visitors during Stampede week.

Mrs. Walcott, who has been visiting her brother, Frank Phillips, left for her home in Ohio.

Larry Woods, of Calgary, and Gordon Dahl, Edmonton, are visitors at the Farquharson home.

Mrs. O'Brien, of Calgary, has been spending a few days with Mrs. Fred Ingham.

Mrs. Farquharson, Sr., has been visiting with her daughter, Mrs. J. McLaren.

Miss Helen McEachern, Mr. M. McEachern and R. Howie are visiting at L. Havens.

The sympathy of the district goes out at this time to Mr. Stone and his family in their recent sad loss.

Again Madden District is proud of Harley Walsh who retained his title of Canadian Championship, at the Calgary Stampede.

## IMPARTIAL AS LIGHT

**YOU** cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

**NEWS** is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

**THE** news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.
